

NEXT.JS

mongoDB

# NEXTJS WITH MONGODB CRUD APP

BASICS & HOW  
TO MAKE CRUD  
APP

React

- **What is NEXTJS ?**

**Next.js is a free and open-source JavaScript framework for building server-rendered React applications. It is built on top of React and Node.js, and it aims to make it easy to build high-performance, scalable, and dynamic web applications.**

**OR**

**The React Framework for Production. Next.js gives you the best developer experience with all the features you need for production: hybrid static & server rendering, TypeScript support, smart bundling, route pre-fetching, and more. No config needed.**

# • Features NEXTJS ?

## The Web SDK

Next.js has all the tools you need to make the Web. Faster.

### Image Optimization

<Image> and Automatic Image Optimization with instant builds.

[Documentation →](#)

### Internationalization

Built-in Domain & Subdomain Routing and Automatic Language detection.

[Documentation →](#)

### Next.js Analytics

A true lighthouse score based on real visitor data & page-by-page insights

[Documentation →](#)

### Zero Config

Automatic compilation and bundling. Optimized for production from the start.

[Documentation →](#)

### Hybrid: SSG and SSR

Pre-render pages at build time (SSG) or request time (SSR) in a single project.

[Documentation →](#)

### Incremental Static Regeneration

Add and update statically pre-rendered pages incrementally after build time.

[Documentation →](#)

# • Features NEXTJS ?

## TypeScript Support

Automatic TypeScript configuration and compilation.

[Documentation →](#)

## Fast Refresh

Fast, reliable live-editing experience, as proven at Facebook scale.

[Documentation →](#)

## File-system Routing

Every component in the `pages` directory becomes a route.

[Documentation →](#)

## API Routes

Optionally create API endpoints to provide backend functionality.

[Documentation →](#)

## Built-in CSS Support

Create component-level styles with CSS modules. Built-in Sass support.

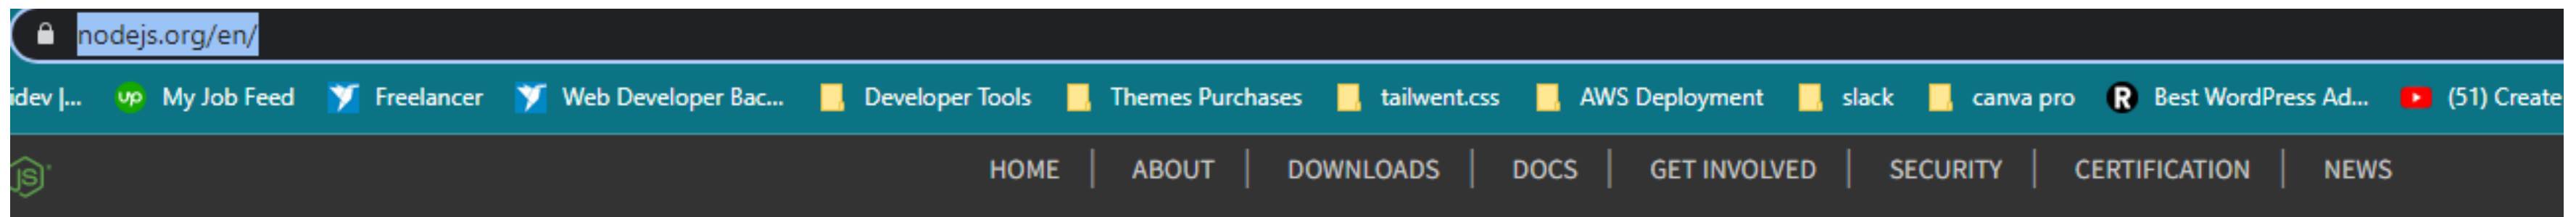

[Documentation →](#)

## Middleware

Dynamic routing defined by code instead of configuration.

[Documentation →](#)

- **How to create NextJs App?**
  - 1. Install Nodejs in your Windows OR Mac Operating system. (<https://nodejs.org>)** 

Node.js® is an open-source, cross-platform JavaScript runtime environment.

Download for Windows (x64)

**18.13.0 LTS**

Recommended For Most Users

**19.4.0 Current**

Latest Features

For information about supported releases, see the [release schedule](#).

## 2. Create New Empty Folder...

## 3. Open Folder in CMD...

```
C:\Windows\System32\cmd.exe

Microsoft Windows [Version 10.0.19045.2486]
(c) Microsoft Corporation. All rights reserved.

D:\New folder (2)\New folder>
```

## 4. Write this command to create Nextjs App Package...

`npx create-next-app myapp`

npx is a package runner tool that comes with npm (Node Package Manager) version 5.2 or higher

create-next-app is a command line tool that allows you to quickly create and set up a new Next.js application

Your App Name

 C:\Windows\System32\cmd.exe

Microsoft Windows [Version 10.0.19045.2486]  
(c) Microsoft Corporation. All rights reserved.

D:\New folder (2)\New folder>npx create-next-app myapp

# 5- Select (NO) All Options...

```
npm
Microsoft Windows [Version 10.0.19045.2486]
(c) Microsoft Corporation. All rights reserved.

D:\New folder (2)>npx create-next-app myapp
npx: installed 1 in 6.036s
✓ Would you like to use TypeScript with this project? ... No / Yes
✓ Would you like to use ESLint with this project? ... No / Yes
✓ Would you like to use `src/` directory with this project? ... No / Yes
✓ Would you like to use experimental `app/` directory with this project? ... No / Yes
Creating a new Next.js app in D:\New folder (2)\myapp.

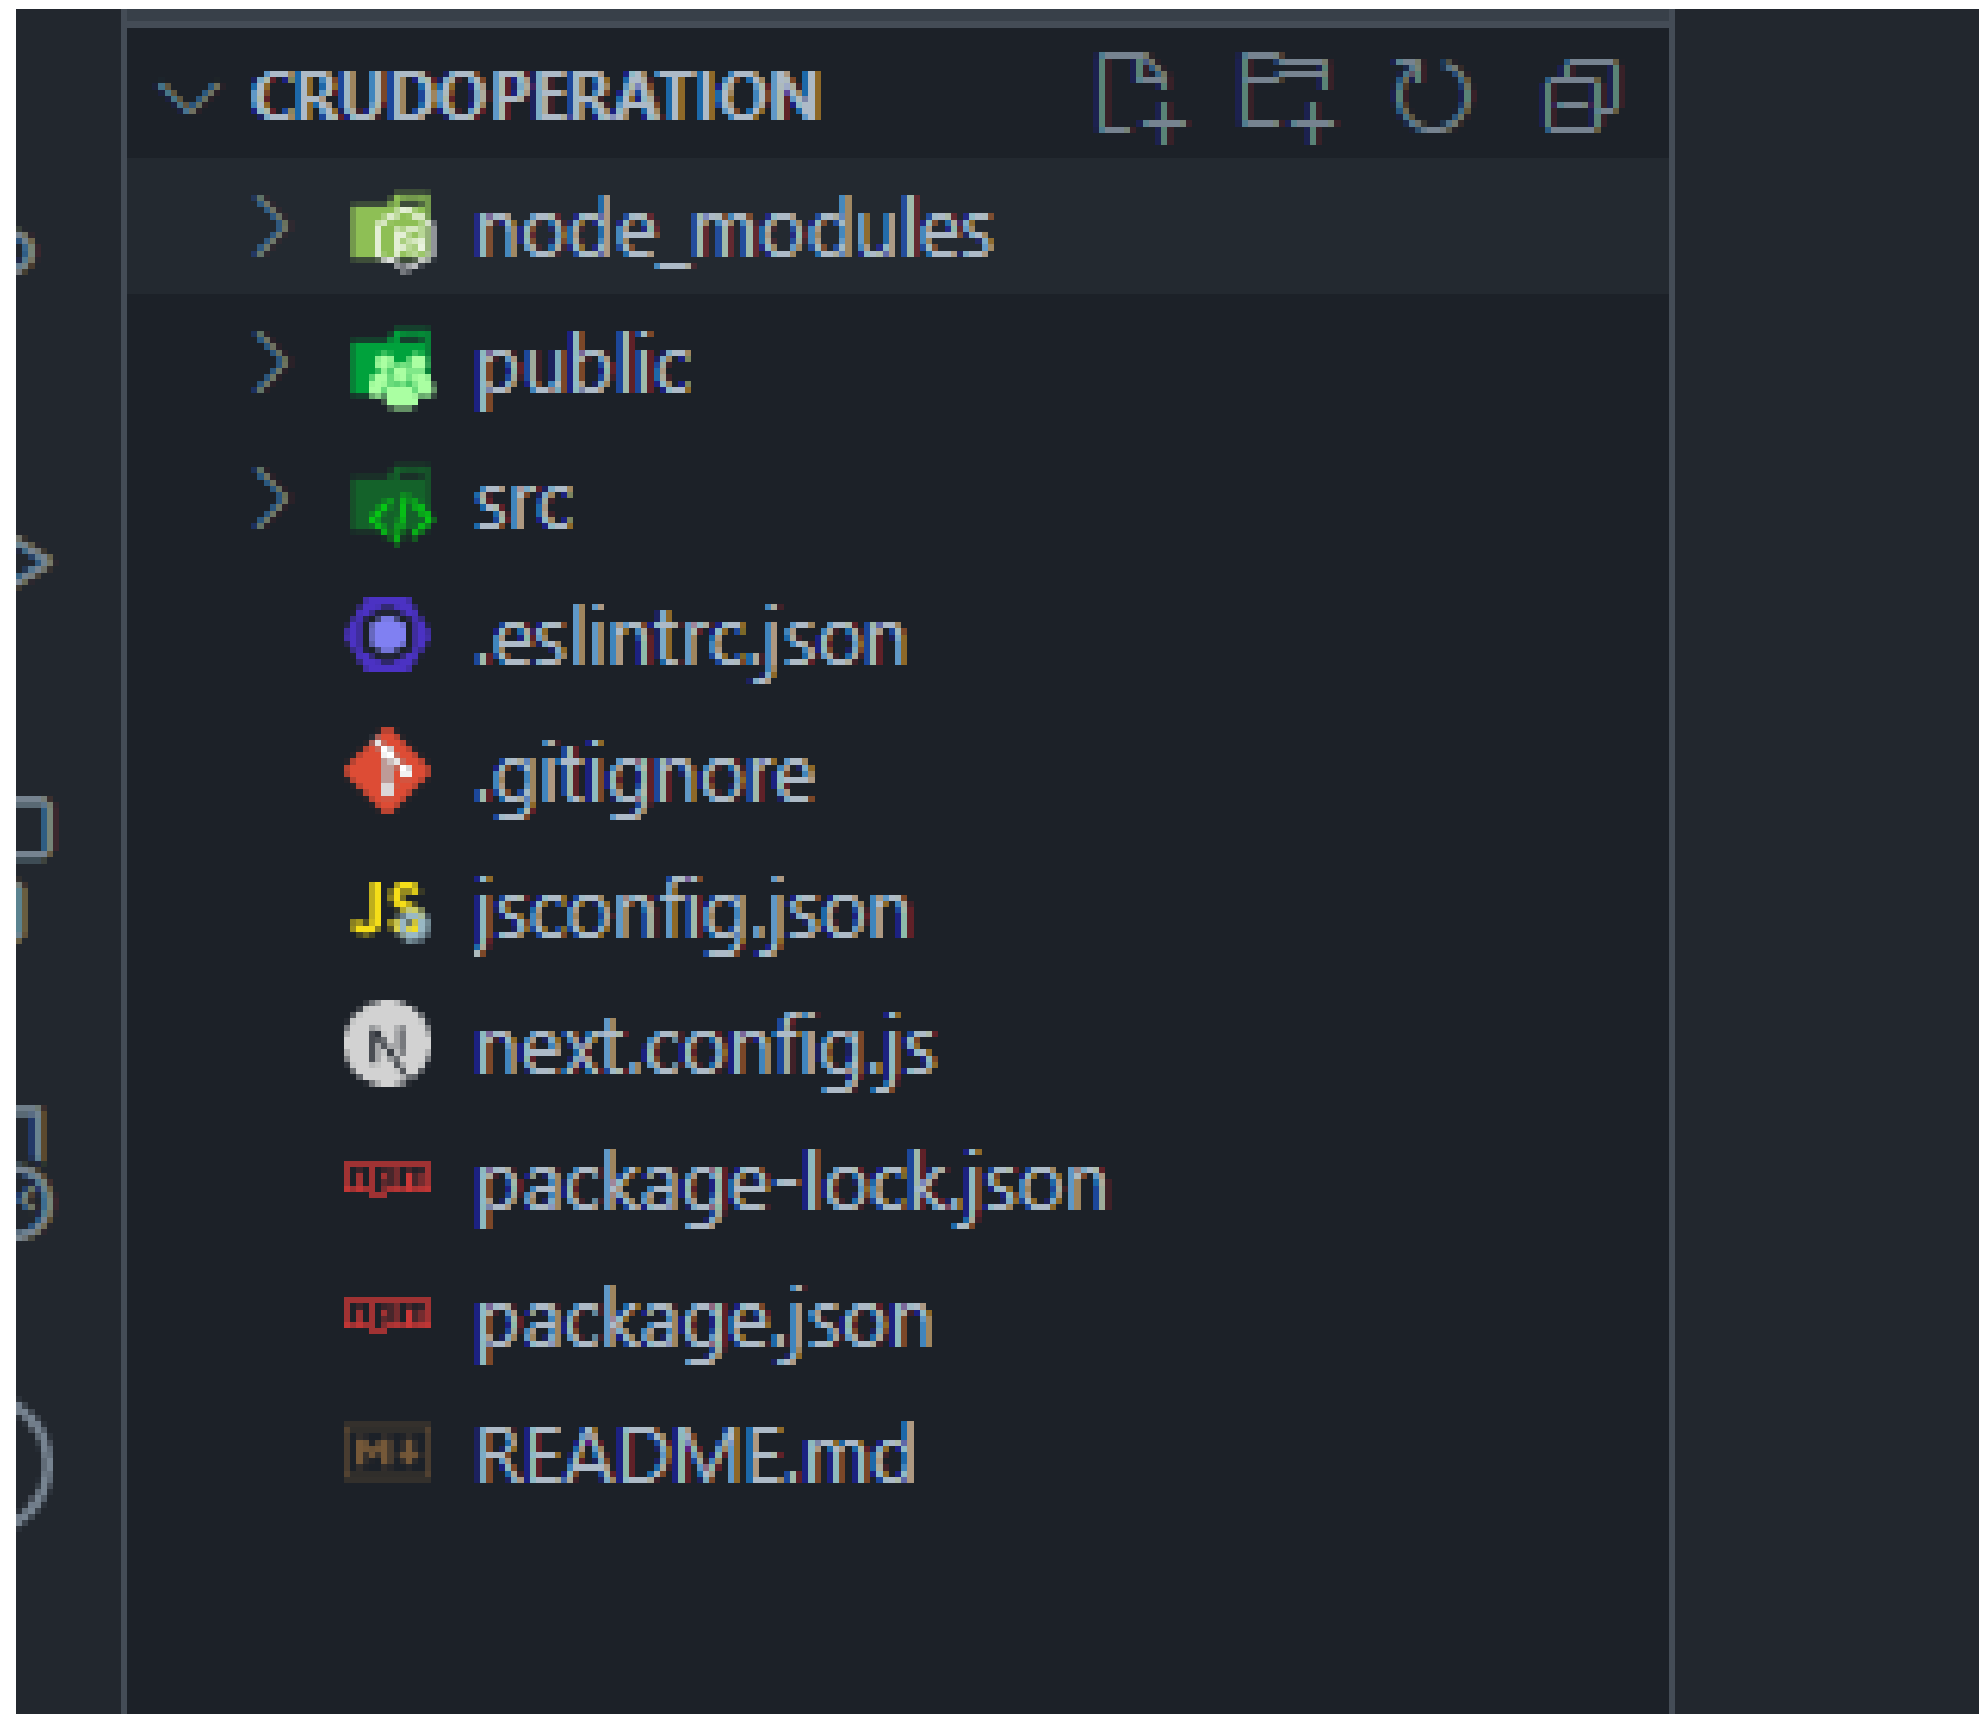

Using npm.

Installing dependencies:
- react
- react-dom
- next
- @next/font

[.....] / rollbackFailedOptional: verb npm-session 540f77be11e54ecd
```

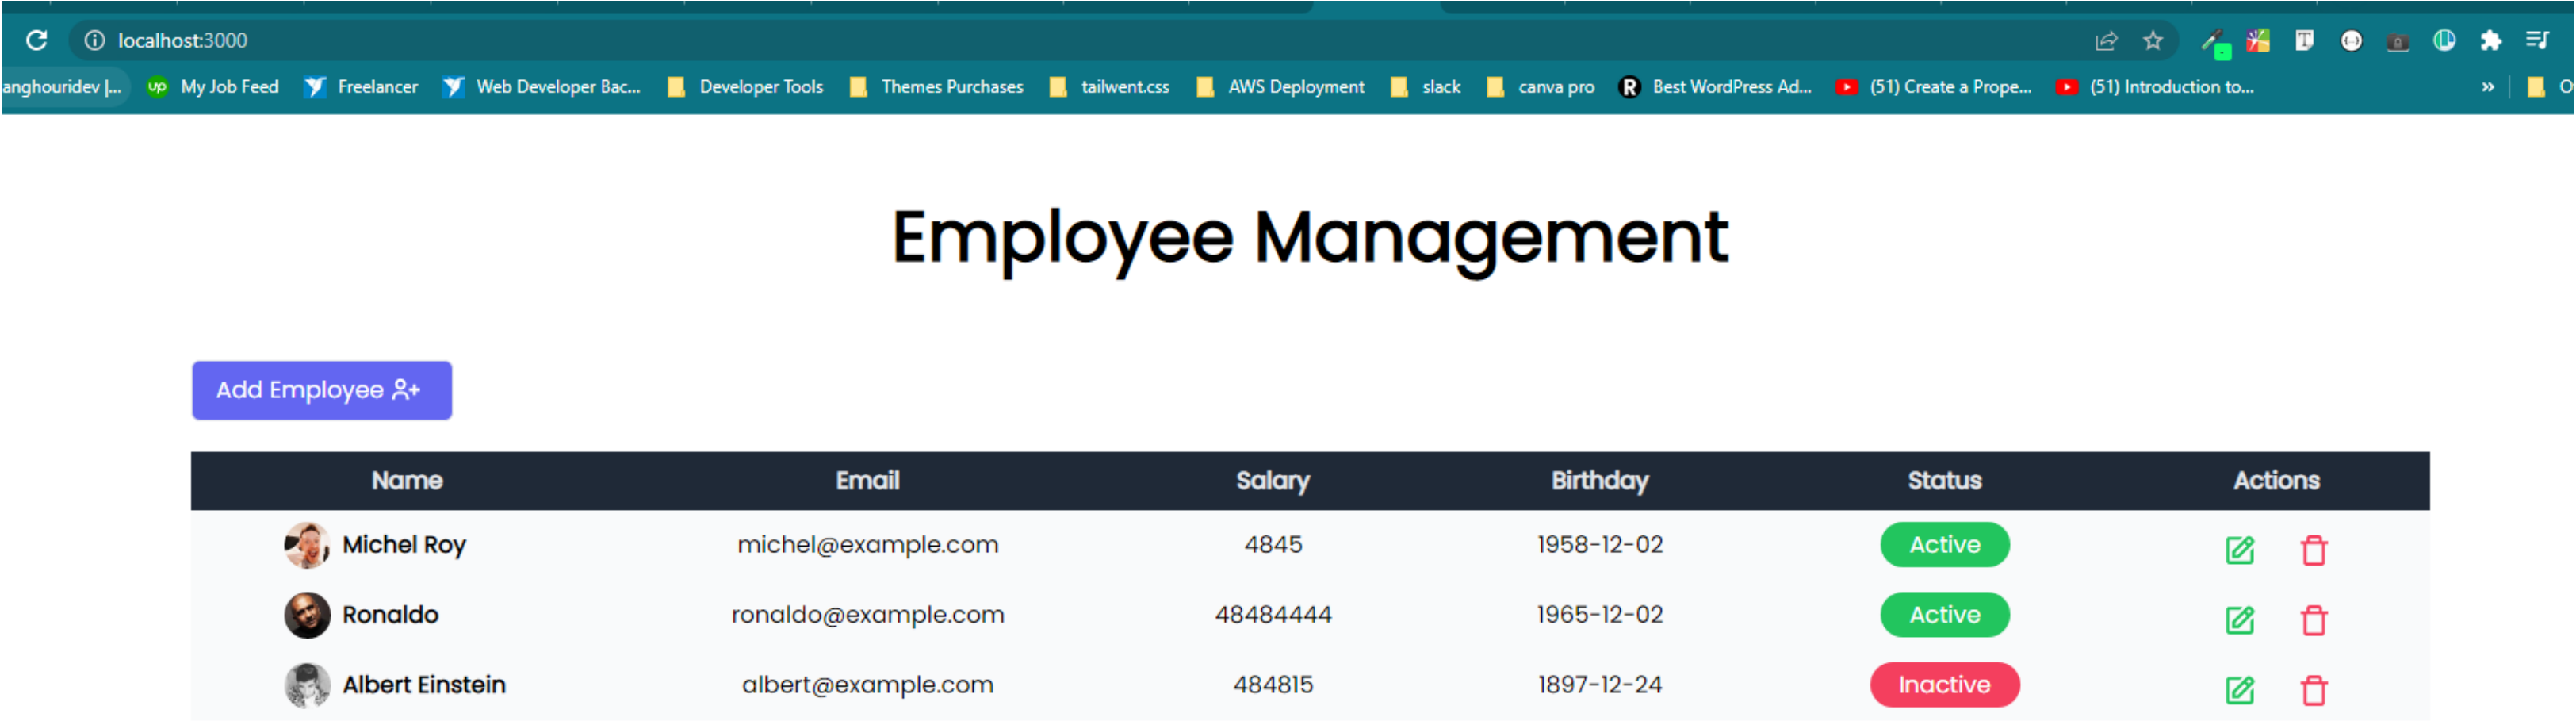

## 5. NEXTJS FOLDER STRUCTURE? After Create NextJS App

# Let's Start CRUD Application Using MongoDB, Nextjs(React), Redux and TailwindCss.

---Final Application Vision Looks Like---
